📍 Dhaka, Bangladesh

OBJECTIVE

ASP.NET Backend Developer (Fresher) with hands-on experience in ASP.NET Core, Web API, and Entity Framework. Built backend projects using SOLID principles and Clean Architecture. Seeking a .NET backend developer role to contribute to production systems and grow within a structured engineering team.

TECHNICAL SKILLS

Languages: C, C++, C#, HTML5, CSS3, Java, Python. **Frontend:** Angular, Javascript, Typescript.
Backend: .NET Core, MVC, Web API, EF Core. **Database:** MSSQL, PostgreSQL, MySQL.
Principles: SOLID, Repository Pattern, Layered Architecture, Role-Based Access Control (RBAC). **Tools & OS:** Git, Github, Windows, Linux.

CERTIFICATION

- Full Stack Web Development with ASP.NET Core Ostad - 2025/2026
 - **Certificate of Completion:** ostad.app/share/certificate/c43475-amdadul-haque-hasan
 - **Certificate of Assessment:** ostad.app/share/certificate/c43476-amdadul-haque-hasan

PROJECTS

- **E-commerce Platform** **Tech:** ASP.NET MVC Core, MSSQL
 - Designing a full-featured e-commerce platform with role-based authentication and authorization via Entity Framework Core Identity.
 - Implementing Repository Pattern to enforce separation of concerns across product, order, and user modules with full CRUD operations and validated business logic.
 - Architecting a scalable layered structure separating data access, business, and presentation layers.
 - **GitHub:** github.com/amdadulhaquehasan/ECommerce-Platform
- **File Management System** **Tech:** ASP.NET Core Web API, PostgreSQL, Angular
 - Built a secure, multi-role File Management System from the ground up following SOLID principles, resulting in a clean, maintainable, and scalable codebase.
 - Implemented Role-Based Access Control (RBAC) to restrict file operations by user type, ensuring data security across multiple user roles.
 - Designed Angular frontend to consume .NET Core REST APIs, applying a layered architecture to fully decouple business logic from infrastructure.
 - **DockerHub:** hub.docker.com/r/amdadulhaquehasan/filemanagementsystem
- **Library Book Management System** **Tech:** ASP.NET Core MVC, Entity Framework Core, SQL Server
 - Developed a layered ASP.NET Core MVC application for managing a library's book catalog, borrowing workflow, and inventory tracking.
 - Applied Entity Framework Core with code-first migrations and structured the codebase into distinct service, repository, and controller layers for clear separation of concerns.
 - Implemented full CRUD functionality with server-side validation and a responsive UI for a polished user experience.
 - **GitHub:** github.com/amdadulhaquehasan/Library-Book-Management-System

EDUCATION

BSc in Information Technology

University of Information Technology And Sciences, Dhaka, Bangladesh

CGPA 3.70 out of 4.00

2021 - 2025

Higher Secondary School Certificate

Dhaka Imperial College, Dhaka, Bangladesh

GPA 5.00 out of 5.00

2020

Secondary School Certificate

KPB School And College, Dhaka, Bangladesh

GPA 4.78 out of 5.00

2018

PROBLEM SOLVING ACTIVITIES

- Solved **200+** data structure and algorithm problems on LeetCode and CodeChef.
- Participated in **50+** online coding contests, strengthening skills in algorithmic thinking and edge-case handling.
- **Profile:** CodeChef: [Amdadul Haque Hasan](#), LeetCode: [Amdadul Haque Hasan](#).

ACHIEVEMENTS & REWARDS

- 2024 UAP Inter University Collaborative Programming Contest 1.0 (Senior) [UITS_Vikings](#)
- 2022 UITS Collaboration Programming Contest [uitsvikings](#)
- 2021 UITS Victory Day Programming Contest [50Mafia](#)

CURRENTLY LEARNING

- **Docker & Containerization** - learning to containerize .NET Core applications for consistent deployment across environments
- **Microsoft Azure (AZ-900)** - studying cloud fundamentals and Azure services relevant to .NET backend deployment
- **Clean Architecture** - deepening understanding of domain-driven design and dependency inversion beyond basic layered architecture
- **CI/CD Pipelines** - exploring GitHub Actions to automate build, test, and deployment workflows
